

Shower Channels

Art & Design

The new range of Quartz by ACO shower channels opens up the bathroom design process, enabling freedom of design and movement.

This innovative new perspective on shower drainage enables traditional style showers with step, or a totally barrier-free design. Units can be positioned anywhere within the base of the shower; as a threshold, against the wall or wherever the layout allows.

The luxurious, electro polished stainless steel or oil-rubbed bronze fixtures complement the latest in luxurious, spa-like bathroom design with the performance and finish expected from the world-leading drainage manufacturer.

Installation is also made much quicker and easier as complex falls and complicated tiling are eliminated.

Simple, one-way falls result in easy tiling.

Channels

- **Edge detail** - plain for flexible CPE membranes; flange edge for painted membranes. Enables use with concrete slab or wood floors.
- **Length** - choice of 5 standard lengths; 700mm (27.55"), 800mm (31.50"), 900mm (35.43"), 1000mm (39.37"), 1200mm (47.25").
- **Grade 304 stainless steel** - all parts are manufactured from grade 304 stainless steel which has been electro polished for enhanced aesthetics.
- **Available in oil-rubbed bronze finish.** Made to order.
- **Outlet connections** - either 2" pipe connector with CPE membrane clamp or 2" adjustable connector.
